

Isotope Ratio Criteria Not Met

- Criteria clearly not met
 - ◆ 4 testosterone breakdown products examined
 - ◆ Look for absolute numbers > 3.8
 - ◆ All must be abnormal for test to be conclusive
- Floyd has only one abnormal

According to published studies and WADA's own protocols, the metabolites or break-down products should be abnormal.

For more details and discussion about the criteria for a positive test, see lawyer Howard Jacob's dismissal motion to the Anti-Doping Review Board.
